

Harouna Sylla

Ottawa, ON – Sylla.harouna96@gmail.com – (613) 227-1255

Summary

• Software Developer

I am a software developer with **3+ years** of industrial experience. I am skilled in multiple programming languages and development tools, with a strong focus on continuous learning and quick adaptability. I am seeking to transition into a new area of software development to apply and expand my expertise while driving impactful solutions.

Technologies

| Python | C / C++ | Java | QML | Qt | Git | SVN | GoogleTest | I2C | SPI | UART | RTL | Linux | SQL | Basics networking concepts | states machines | Conan C++ package manager | GitLab CI/CD | CMake build tool |

Professional Experience

Software Developer | Zimmer Biomet

Oct 2022 – Feb 2026

- Participating in development of new features for surgery software using **Python** and **C++**.
- Participate in a proof of a concept for a new software product, demonstrating feasibility and paving the way for implementation.
- Participating in GUI development using **QML**, enhancing user experience for surgeons during surgeries.
- Participate in software design reviews, contributing to well-architected solutions.
- Implementing unit tests with **Google Test** to ensure code quality.
- Participating in code reviews on **GitLab** to ensure code correctness and adherence to company coding standards.
- Collaborating with cross-functional teams of system designers, testers and mechanical engineers to ensure seamless integration of software with robotic systems.
- Reviewing software-related documents (SRS, architecture, risk analysis, FMEA, validation) to ensure compliance with FDA quality standards.
- Successfully onboarded a new software developer hire.

Projects

Intelligent Distribution Panel | Jan 2022 – Apr 2022

Course: Real-Time Operating System **C programming language, RTOS**

- Design and implement of General-Purpose Input Output (GPIO)
- Testing of GPIO
- Design and implement of the module of Data Acquisition
- Testing of the module Data Acquisition

Food Delivery Robot | Sep 2021 – Apr 2022

Course: Engineering Design Project **Python, Rasa framework**

- Research the technologies we could use to implement the natural languages processing
- Implementing natural language processing which allows the robot to talk with people.
- Implementing the rasa chatbot
- Testing the rasa chatbot with rasa-x.

6 Nimmt Game | Sep 2020 – Dec 2020

Course: Advanced Programming Concepts with C++ / Difference between C++ and Java

- Implement the **Joueur** module, which contains player's hand and his number of Points.
- Implement the **Plateau6nimmt** module, which manages cards on the table and the logic behind.
- Implement the **Paquet** (deck) module, which generates all the cards needed for the game and shuffles them.
- Implement others functions in **main** class.

Education

University Of Ottawa | **Bachelor - Computer Engineering** | 2022, Ottawa, Ontario
